

NAVIGATION SYSTEM

Desktop baseline - darker, clearer, calmer

This page fixes the final surface hierarchy, typography, spacing and language behavior. The visual goal is premium glass with controlled depth - never opaque cards, never near-black UI.

EXACT SURFACE TOKENS

Page / Warm Deep Teal	#1C4744
Navbar glass base	#123735 / 88% visual opacity
Dropdown glass base	#0B2D2B / 91% visual opacity
Interaction Orange	#FD9105

TYPOGRAPHY

Navbar labels: Inter Display Medium 10.5 pt in this visual reference; production equivalent 14-15 px / 500. No condensed or heavy all-caps treatment.

Default: off-white. Open / hover / focus / active route: orange. CTA gains weight from its surface, not from heavier text.

SPACING CONTRACT

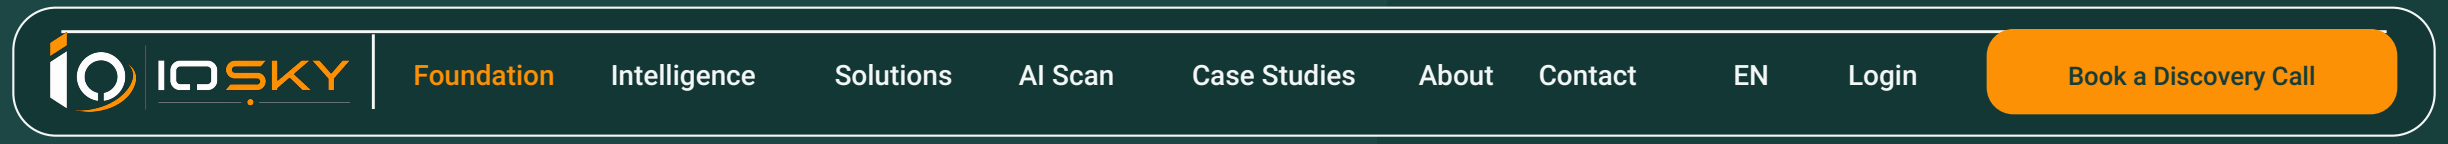

Logo first nav: 28-32 px. Primary items: 26-32 px where possible. Contact Language: 28 px minimum. Language Login: 20 px. Login CTA: 18 px. Break earlier rather than compress until labels collide.

LANGUAGE POLICY

The primary navbar taxonomy remains in English across localized website content: Foundation, Intelligence, Solutions, AI Scan, Case Studies, About and Contact. The language selector changes page/content language, not these brand/IA labels. Product names also remain unchanged.

INTERACTION POLICY

Foundation, Intelligence, Solutions and AI Scan open on pointer hover or keyboard focus. No chevrons, carets, triangles or dropdown symbols. Case Studies, About and Contact are direct links. Language is the only dropdown that opens only on click/tap/Enter/Space.

FOUNDATION OPEN STATE

Operational Infrastructure
The foundation connecting systems, data and operations.

Data Infrastructure
Structured data built to move reliably across the organization.

Integrations
Connect systems, services and operational data.

Security & Reliability
Protecting resilience and operational continuity.

Explore Foundation

DESKTOP DROPDOWN REFERENCE

Foundation dropdown

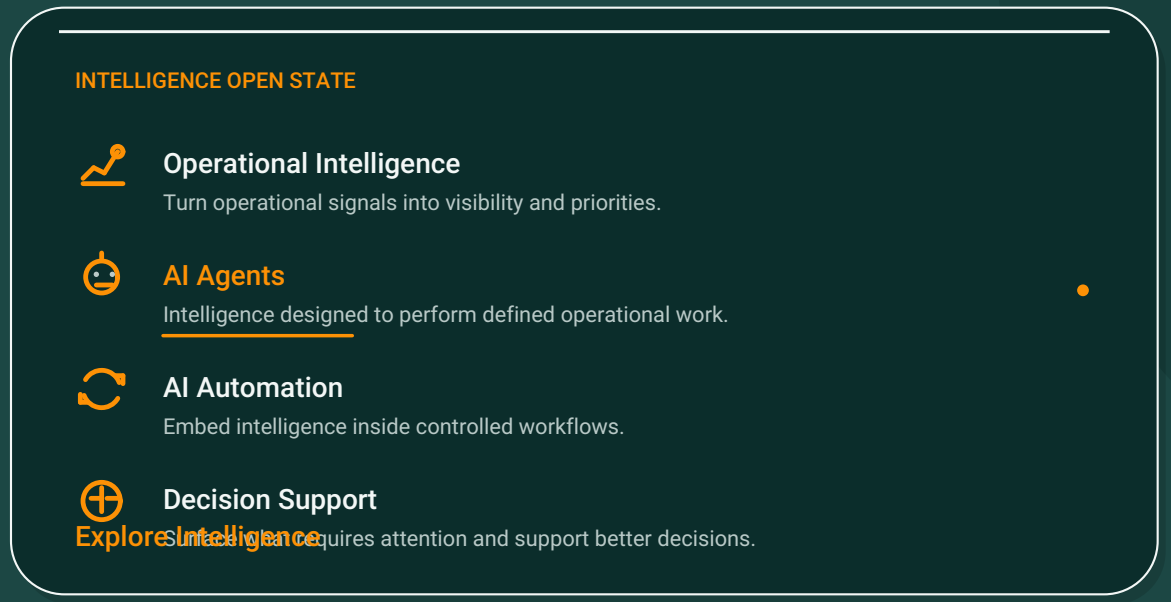

The top-level label stays orange while the panel is open. Dropdown item titles are off-white by default; hover, keyboard focus, pressed state and active route turn the selected item orange. The Explore route is always orange.

STATE BEHAVIOR

- Hover/focus on Foundation: open panel.
- Forgiving pointer bridge; no flicker.
- Pressed / focus / active item: orange.
- Active top-level label remains orange.
- Escape closes; one primary panel at a time.
- No chevron, caret or dropdown symbol.

ICON GENERATION DESCRIPTIONS

Operational Infrastructure	Minimal 2026 line icon: modular infrastructure frame with a central control node; geometric, calm, 1.75px rounded stroke, no fill, orange only.
Data Infrastructure	Abstract stacked data vessel with one clean signal line; architectural rather than database-clipart; rounded orange monoline.
Integrations	Three connected nodes in asymmetric triangular topology; restrained, technical, no chain-link cliché; orange monoline.
Security & Reliability	Angular shield contour with one quiet verification notch; enterprise, minimal, no lock cliché; orange monoline.

DESKTOP DROPDOWN REFERENCE

Intelligence dropdown

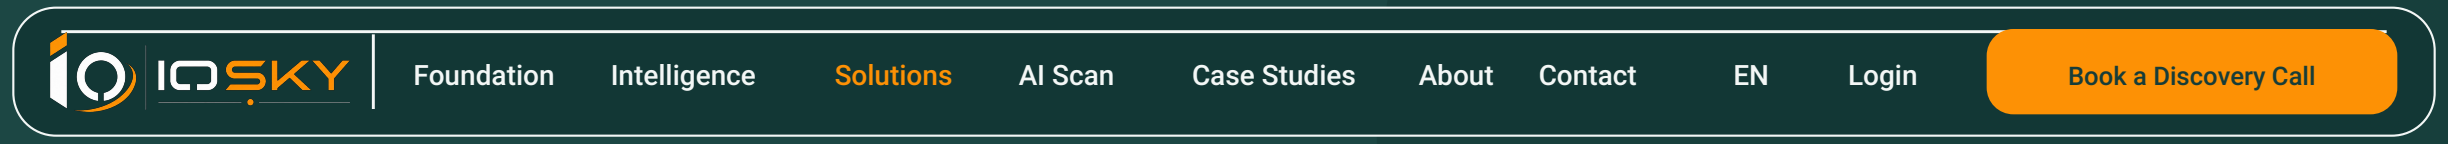

The top-level label stays orange while the panel is open. Dropdown item titles are off-white by default; hover, keyboard focus, pressed state and active route turn the selected item orange. The Explore route is always orange.

STATE BEHAVIOR

- Hover/focus on Intelligence: open panel.
- Forgiving pointer bridge; no flicker.
- Pressed / focus / active item: orange.
- Active top-level label remains orange.
- Escape closes; one primary panel at a time.
- No chevron, caret or dropdown symbol.

ICON GENERATION DESCRIPTIONS

Operational Intelligence	Rising operational signal path ending in one precision node; abstract analytics, not a chart icon; orange monoline.
AI Agents	Abstract agent core: circular intelligence node with two quiet signal points; no humanoid robot; orange monoline.
AI Automation	Two-part controlled loop with deliberate gap and directional geometry; no generic gear icon; orange monoline.
Decision Support	Decision aperture / compass-like ring with aligned center axis; calm and precise, no lightbulb; orange monoline.

SOLUTIONS OPEN STATE

Growth Ecosystem
Infrastructure designed around growth and revenue operations.

Operational Ecosystem
Connected systems for more controlled day-to-day operations.

Enterprise Ecosystem
Infrastructure for broader operational complexity and scale.

Custom Architecture
Precision infrastructure for requirements outside predefined systems.

Explore Solutions

DESKTOP DROPDOWN REFERENCE

Solutions dropdown

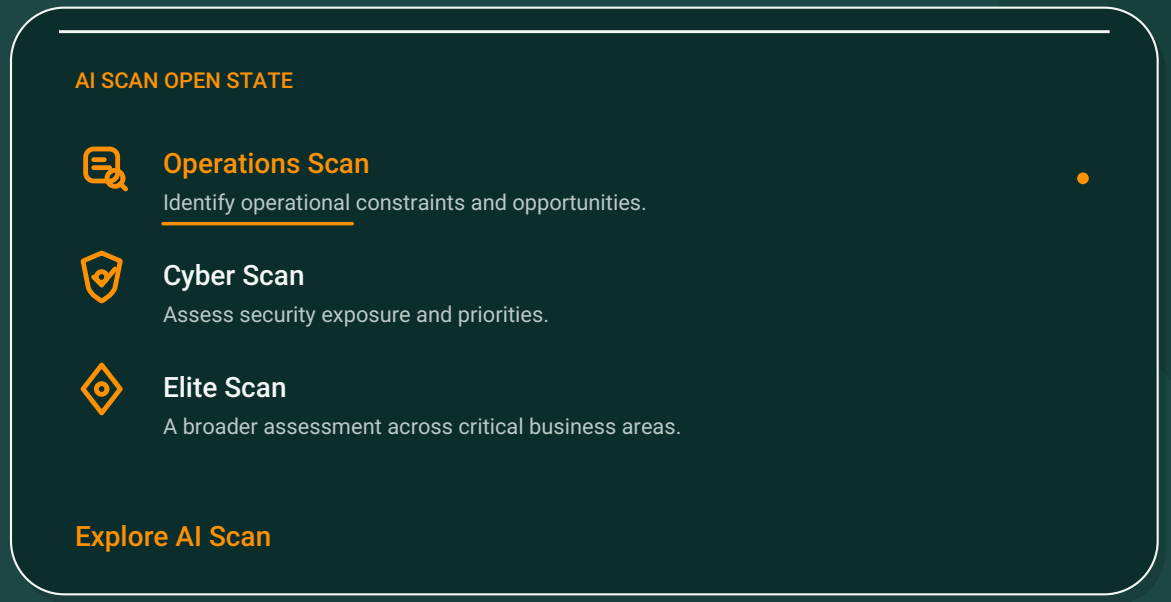

The top-level label stays orange while the panel is open. Dropdown item titles are off-white by default; hover, keyboard focus, pressed state and active route turn the selected item orange. The Explore route is always orange.

STATE BEHAVIOR

- Hover/focus on Solutions: open panel.
- Forgiving pointer bridge; no flicker.
- Pressed / focus / active item: orange.
- Active top-level label remains orange.
- Escape closes; one primary panel at a time.
- No chevron, caret or dropdown symbol.

ICON GENERATION DESCRIPTIONS

Growth Ecosystem	Ascending connected path with one controlled acceleration point; premium business growth abstraction, no bar chart; orange monoline.
Operational Ecosystem	Compact operations console with two process lanes and one state node; architectural, not dashboard clipart; orange monoline.
Enterprise Ecosystem	Two interlocking vertical system towers joined by a baseline; scalable infrastructure feel; orange monoline.
Custom Architecture	Precision architecture core with four alignment axes; bespoke system design, not wrench/hammer; orange monoline.

DESKTOP DROPDOWN REFERENCE

AI Scan dropdown

The top-level label stays orange while the panel is open. Dropdown item titles are off-white by default; hover, keyboard focus, pressed state and active route turn the selected item orange. The Explore route is always orange.

STATE BEHAVIOR

- Hover/focus on AI Scan: open panel.
- Forgiving pointer bridge; no flicker.
- Pressed / focus / active item: orange.
- Active top-level label remains orange.
- Escape closes; one primary panel at a time.
- No chevron, caret or dropdown symbol.

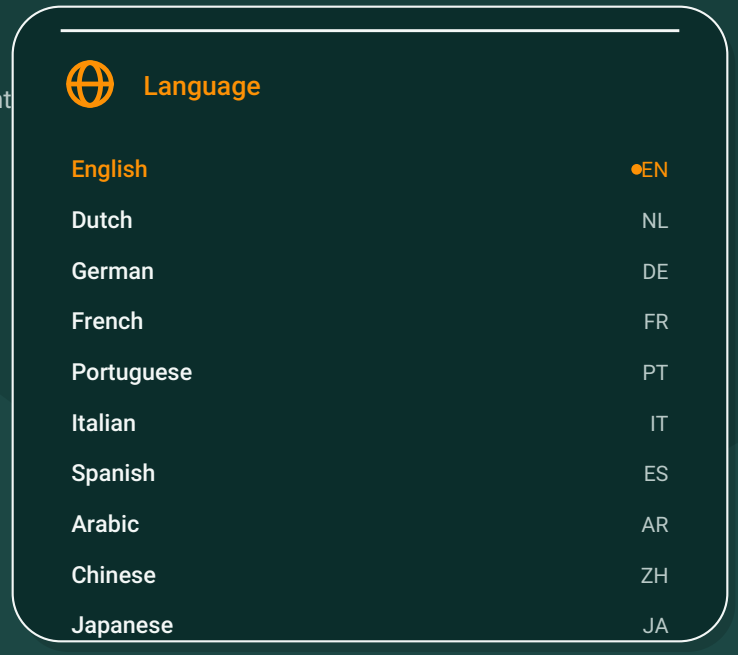

ICON GENERATION DESCRIPTIONS

Operations Scan	Scan frame intersecting an operations surface with one analysis lens; clean, technical, orange monoline.
Cyber Scan	Shield geometry intersected by a small scanning aperture; security assessment, no padlock; orange monoline.
Elite Scan	Faceted diamond-like assessment core with central target node; broad premium assessment, restrained orange monoline.

LANGUAGE SELECTOR

Click / tap only - 10 visible languages

Language is intentionally the only dropdown that never opens from pointer hover. Hover is visual feedback only; activation requires click, tap, Ent

OPENING / CLOSING CONTRACT

Hover over EN/globe: control may turn orange, but nothing opens. Click/tap/Enter/Space opens this exact list. Second activation, Escape or click outside closes. Selecting a language persists the choice and closes the selector.

LOCALIZATION RESOLUTION WHEN NO EXPLICIT PREFERENCE EXISTS

1) authenticated portal/account language 2) stored website preference 3) supported browser language 4) IP localization as fallback signal 5) English. IP must never silently override a user choice. Arabic content requires RTL support.

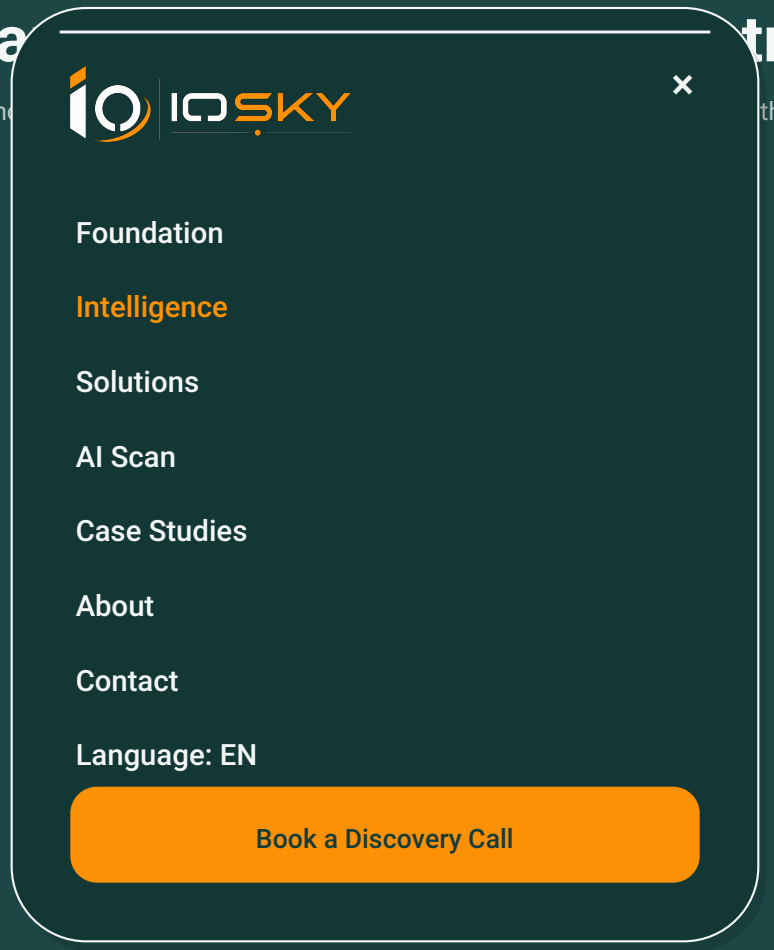

NAVBAR LABELS REMAIN STABLE

The main navbar labels remain English in every locale. This keeps the brand taxonomy stable while page copy and supporting content localize. The selector itself may display native language names exactly as shown here.

MOBILE / RESPONSIVE

Sa trast

Do n the com

EXAMPLE: INTELLIGENCE EXPANDED AFTER TAP

Operational Intelligence
Turn operational signals into visibility and priorities.

AI Agents
Intelligence designed to perform defined operational work.

AI Automation
Embed intelligence inside controlled workflows.

Decision Support
Surface what requires attention and support better decisions.

Explore Intelligence

RESPONSIVE CONTRACT

≥ 1280 px: full desktop navbar with target gaps. 1024-1279 px: modestly reduce primary gaps only; utility separation remains. < 1024 px: compact/mobile trigger. On touch, Foundation / Intelligence / Solutions / AI Scan expand by tap, one section at a time. Language remains click/tap only.

MOBILE GLASS

Use the same hue family but slightly stronger opacity than desktop for legibility: #123735 navbar base with approximately 94% visual opacity, continuous backdrop blur, subtle off-white edge and restrained top reflection. No nested opaque cards.

IMPLEMENTATION CONTRACT

Zero-ambiguity developer rules

These rules are normative. The visual pages above are the reference states; implementation should preserve the same hierarchy across desktop, keyboard and touch input.

SURFACE & TYPOGRAPHY

- Page #1C4744. Navbar #123735. Dropdown #0B2D2B. Orange #FD9105.
- Production glass: backdrop blur 20-24 px; 1 px off-white edge at ~10% opacity; restrained top reflection; soft shadow only.
- Use Inter / Inter Display. Navbar 14-15 px, weight 500. Avoid condensed, extra-bold or all-caps navigation.
- Official supplied IO SKY logo at far left, transparent background, clickable to homepage. Do not redraw or recolor the asset.

INTERACTION STATES

- Foundation / Intelligence / Solutions / AI Scan: hover + keyboard focus open. No dropdown symbols.
- Top-level open label is orange. Dropdown item default is off-white; hover/focus/pressed/active route is orange.
- Explore Foundation / Intelligence / Solutions / AI Scan is always orange, text-only. Do not append a chevron/arrow in the navbar.
- Language only opens by click/tap/Enter/Space. Hover never opens it.

SPACING & QA

- No text overlap at any viewport. If target gaps cannot be preserved, switch to compact/mobile navigation instead of squeezing.
- Contact Language 28 px minimum; Language Login 20 px; Login CTA 18 px. Logo first nav 28-32 px.
- Dropdown is one continuous glass surface. Items are not cards and do not gain opaque filled backgrounds.
- QA at desktop, 1280 px, 1024 px boundary, tablet and small mobile; test long content, keyboard, RTL page content, reduced motion and touch.

ICON FAMILY - 2026 IO SKY LANGUAGE

All dropdown icons are original orange monoline symbols: 18-20 px desktop, 18 px mobile, approximately 1.75 px stroke, rounded terminals, geometric and architectural. Avoid vendor icon libraries when they make the system generic; avoid emoji, multicolor, filled glyphs, gradients, robot faces, padlock clichés, gears and clip-art metaphors. The generation descriptions on each dropdown page are the semantic source for the final SVG family.
